

LEADSQUARED QA Test

1. There can be 6 possible situations in which we can get into:
 - New customer having coupon
 - New customer not having coupon
 - Old customer having loyalty card and not having coupon
 - Old customer not having loyalty card and not having coupon
 - Old customer having loyalty card and coupon
 - Old customer not having loyalty card and having coupon

Discount↓ ----- kind of customers→	New customer having coupon	New customer not having coupon	Old customer having loyalty card and not having coupon	Old customer not having loyalty card and not having coupon	Old customer having loyalty card and coupon	Old customer not having loyalty card and having coupon
10%			◆		◆	
15%		◆				
20%	◆				◆	◆
No Discount				◆		

2. The first argument is reasonable because to open another big shop at another location the business must be going good. But both the businesses of Ronnie and Jenny are very different from each other so there can be different effects on their businesses according to locations and if we are talking about Jenny's business then if we see after moving to a new location it takes time to set up a brand that business had in its former location so it is very natural for a business to earn less in their initial stage at a new location.

3. Some test cases of a wireless mouse are:-
 - Checking range up to which mouse can work properly
 - Check battery of the mouse
 - Check grip
 - Check the left and the right clicks properly
 - Check if a mouse is wireless or not
 - Check drag and drop functionality

- Check if the button is present to switch on and off the mouse
- Check the surfaces on which mouse can work

After checking all of this mouse can be considered good or not good
